A Special Feature:

Brief Information about *Vito Volterra*

(A Great Italian Mathematician)

Full Name: Vito Volterra

*Born on***:** May 3, 1860

*Place of Birth***:** Ancona, Papal States

Nationality: Italian

Father: Abramo Volterra, a cloth merchant

Mother: Angelica Almagià

Valuable contributions to the fields: Mathematical Biology, Integral Equations, Functional Analysis etc

Research Advisor: Enrico Betti

Scholars who influenced him: Enrico Betti

Education in the Universities: University of Pisa

Revolutionary Contributions: Volterra's function, Lotka–Volterra equation, Smith–Volterra–Cantor set, Volterra integral equation, Volterra series, Product integral,Volterra operator,Volterra space, Volterra Semiconductor, Poincaré lemma etc

*His Famous Student***:** Paul Levy and Joseph Peres

*Awards/Rewards***:** Gold medal of the National Academy of Sciences of Italy, Member of The Pontifical Academy of Sciences, Fellowship of The Royal Society etc.

Life span: 80 years

Died on: October 11, 1940

Place of Death: Rome, Italy
